THE BRITISH JOURNAL
OF
EXPERIMENTAL PATHOLOGY

THE BRITISH JOURNAL OF EXPERIMENTAL PATHOLOGY

EDITORS
S. P. Bedson, J. R. Marrack, E. Schuster, Wilson Smith

GENERAL EDITOR
P. Fildes

VOLUME SEVENTEEN

1936

LONDON
H. K. LEWIS & Co. Ltd.
136 GOWER ST., W.C. 1

CANADA: THE MACMILLAN COMPANY OF CANADA, LTD., BOND STREET, TORONTO

Made and Printed in Great Britain.

CONTENTS

No. 1.—FEBRUARY.

PAGE

LEWTHWAITE, R., AND SAVOOR, S. R.—The Typhus Group of Diseases in Malaya.—Part I: The Study of the Virus of Rural Typhus in Laboratory Animals. Part II: The Study of the Virus of Tsutsugamushi Disease in Laboratory Animals 1

LEWTHWAITE, R., AND SAVOOR, S. R.—The Typhus Group of Diseases in Malaya. Part III: The Study of the Virus of the Urban Typhus in Laboratory Animals 23

HARLEY, DAVID.—Determining the Group of Human Blood-stains: Notes on an Anomalous Group O Serum 35

SPASSKY, N. N., AND DANENFELDT, L. A.—Immunological Study of Typhoid Polysaccharide 38

GORER, P. A.—The Detection of Antigenic Differences in Mouse Erythrocytes by the Employment of Immune Sera 42

ELFORD, W. J., ANDREWES, C. H., AND TANG, F. F.—The Sizes of the Viruses of Human and Swine Influenza, as Determined by Ultra-Filtration 51

KLIGLER, I. J., ASCHNER, M., AND LEVINE, SONIA.—Comparative Studies of the Louse-borne (Epidemic) and Flea-borne (Murine) Typhus Viruses 53

STRONG, LEONELL, C.—Production of the CBA Strain of Inbred Mice: Long Life Associated with Low Tumour Incidence 60

BAWDEN, F. C., AND PIRIE, N. W.—Experiments on the Chemical Behaviour of Potato Virus "X" 64

HODGSON, T. H.—The Carbonic Anhydrase Content of Blood in Pathological States in Man 75

FELIX, A., AND PITT, R. MARGARET.—The Vi Antigens of Various Salmonella Types 81

No. 2.—APRIL.

ÅGREN, GUNNAR, AND CASPERSSON, TORBJÖRN.—Reticulocytosis in Guinea-pigs in Relation to the Standardization of Liver-Extract . . . 87

FINDLAY, G. M.—The Mechanism of Immunity in Rift Valley Fever . . 89

TAYLOR, N. B., WELD, C. B., AND SYKES, J. F.—Parathormone Tolerance in Dogs 104

BEDSON, S. P.—Observations Bearing on the Antigenic Composition of Psittacosis Virus 109

WATSON, A. F.—The Daels and Biltris Transplantable Sarcoma of the Guinea-pig 122

WATSON, A. F.—The Chemical Reducing Capacity and Vitamin C Content of Transplantable Tumours of the Rat and Guinea-pig 124

BROOM, J. C., AND FINDLAY, G. M.—Experiments on the Filtration of Climatic Bubo (Lymphogranuloma Inguinale) Virus Through "Gradocol" Membranes 135

PAGE

HAPPOLD, FRANK CHARLES, AND HOYLE, LESLIE.—The Coli-tryptophan-indole Reaction: II. The Non-production of tryptophanase in Media Containing Glucose 136

HARLEY, DAVID.—The Agglutinogens M and N in Allergic Conditions . 143

HARLEY, DAVID.—A False Agglutination Reaction Observed with Anti-M and Anti-N Sera 145

CAMPBELL, J. ARGYLL.—The Effects of Exhaust Gases from Internal Combustion Engines and of Tobacco Smoke upon Mice, with Special Reference to Incidence of Tumours of the Lung 146

No. 3.—JUNE.

GORDON, J., AND THOMPSON, F. C.—The Artificial Opsonization of Bacteria . 159

PEACOCK, P. R.—Evidence Regarding the Mechanism of Elimination of 1 : 2-Benzpyrene, 1 : 2 : 5 : 6-Dibenzanthracene, and Anthracene from the Blood-stream of Injected Animals 164

ASCHNER, M., AND KLIGLER, I. J.—Behaviour of Louse-borne (Epidemic) and Flea-borne (Murine) Strains of Typhus *Rickettsia* in Tissue Cultures . 173

GRASSET, E., AND LEWIN, W.—The Production and Persistence of H and O Agglutinins and Complement-Fixing Bodies in Persons Inoculated with Typhoid Endotoxoid Vaccine 179

GALLOWAY, I. A., AND ELFORD, W. J.—Purified Foot-and-Mouth Disease Virus. I: Studies on Some of its Physical Properties 187

BAWDEN, F. C., PIRIE, N. W., AND SPOONER, E. T. C.—The Production of Antisera with Suspensions of Potato Virus "X" Inactivated by Nitrous Acid 204

LEWTHWAITE, R., AND SAVOOR, S. R.—The typhus Group of Diseases in Malaya. Part IV: The Isolation of Two Strains of Tropical Typhus from Wild Rats 208

LEWTHWAITE, R., AND SAVOOR, S. R.—The Typhus Group of Diseases in Malaya. Part V: The Weil-Felix Reaction in Laboratory Animals . . 214

WHITE, P. BRUCE.—Observations on the Polysaccharide Complex and Variants of *Vibrio choleræ* 229

SELYE, HANS.—Thymus and Adrenals in the Response of the Organism to Injuries and Intoxications 234

No. 4.—AUGUST.

RABINOWITCH, I. M.—A Note on the Bilirubin Content of Blood and Urobilinogen Content of Urine in Diabetes Mellitus 249

TIMMERMAN, W. AEG., AND BRANDWIJK, A. C.—Experiments on the Immunizing Properties of Undiluted and Diluted Diphtheria Formol-Toxoid . . 252

KAPP, ELEANOR M., AND COBURN, ALVIN F.—Studies on the Excretion of Urinary Porphyrin in Rheumatic Fever 255

CRUSE, J. E. J., AND ROSE, CHAS. F. M.—The Estimation of Phosphatase in Fluoride Blood 267

PAGE

PIRIE, N. W.—Some Chemical Methods for the Detection and Rough Estimation of Agar in Biological Materials. 269

WALE, R. S., AND MADDERS, KATE.—Staphylococcal Toxoid in the Treatment of Diabetes 279

BURNET, F. M.—Influenza Virus on the Developing Egg : I. Changes Associated with the Development of an Egg-passage Strain of Virus . . 282

BURNET, F. M.—Observations on the Effect of Louping Ill Virus on the Developing Egg 294

BURNET, F M., AND LUSH, DORA.—The Immunological Relationship between Kikuth's Canary Virus and Fowl-pox 302

JACOBSON, BERNARD M.—A Note on the Guinea-pig Method of Assay of Liver Extract 307

LEWTHWAITE, R., HODGKIN, E. P., AND SAVOOR, S. R.—The Typhus Group of Diseases in Malaya. Part VI : The Search for Carriers . . . 309

HOLT, LEWIS B.—The Purification of Staphylococcus Toxoid . . . 318

STUART-HARRIS, C. H.—The Transmission of Influenza Virus to Hedgehogs . 324

SMITH, FREDERICK.—Anaërobic Pneumococcus 329

No. 5.—OCTOBER.

PAPPENHEIMER, ALWIN, M., JUN., AND JOHNSON, SYLVIA J.—Studies in Diphtheria Toxin Production. I : The Effect of Iron and Copper . 335

PAPPENHEIMER, ALWIN M., JUN.—Studies in Diphtheria Toxin Production. II : Production of Potent Diphtheria Toxin on a Simple Amino-Acid Medium 342

SELBIE, F. R.—The Interpretation of Growth Fluctuations in Transplantable Tumours 344

SELBIE, F. R.—Susceptibility to Tumour Growth in Rats 348

MACKENZIE, R. D., FINDLAY, G. M., AND STERN, RUBY O.—Studies on Neurotropic Rift Valley Fever Virus : The Susceptibility of Rodents . 352

SNAPPER, I., AND GRUNBAUM, A.—On the Immunity Reactions of Iodo-proteins 361

HUGHES, W. HOWARD.—The Alteration in the Bactericidal Power of the Blood in the Presence of Inflammation 369

PRIESTLEY, F. W.—Some Properties of the Capsule of *Pasteurella septica* . 374

DELAFIELD, M. E., AND SMITH, H. A.—The Influence of Certain Bacterial Fractions Derived from *Bact. aertrycke* on the Oxygen Uptake of Rabbit Brain and Muscle Suspensions 379

STAMP, T. C.—Antibacterial Immunity to Infection with Hæmolytic Streptococci in Rabbits 391

ELFORD, W. J.—Centrifugation Studies : I. Critical Examination of a New Method as Applied to the Sedimentation of Bacteria, Bacteriophages and Proteins 399

ELFORD, W. J., AND ANDREWES, C. H.—Centrifugation Studies : II. The Viruses of Vaccinia, Influenza and Rous Sarcoma 422

No. 6.—DECEMBER.

PAGE

FINDLAY, G. M., MACKENZIE, R. D., AND STERN, RUBY O.—Studies on Neurotropic Rift Valley Fever Virus : The Susceptibility of Sheep and Monkeys 431

FINDLAY, G. M., AND MACKENZIE, R. D.—Studies on Neurotropic Rift Valley Fever : " Spontaneous " Encephalomyelitis in Mice 441

LEWTHWAITE, R., AND SAVOOR, S. R.—The Typhus Group of Diseases in Malaya. Part VII : The Relation of Rural Typhus to the Tsutsugamushi Disease (with Special Reference to Cross-immunity Tests) . . 448

LEWTHWAITE, R., AND SAVOOR, S. R.—The Typhus Group of Diseases in Malaya. Part VIII : The Relation of the Tsutsugamushi Disease (including Rural Typhus) to Urban Typhus. Part IX : The Relation of the Tsutsugamushi Disease (including Rural Typhus) and Urban Typhus to Rocky Mountain Spotted Fever. (With Special Reference to Cross-immunity Tests.) 461

MACCULLAM, F. O.—The Necessity of Living Cells for the Cultivation of Psittacosis Virus 472

FILDES, PAUL, RICHARDSON, G. M., KNIGHT, B. C. J. G., AND GLADSTONE, G. P.—A Nutrient Mixture Suitable for the Growth of *Staphylococcus aureus* 481
